MTBF	BELLCORE TR332, (25°C)		2X10 ⁵ Hrs

NOTE:

(1)The module working environment temperature more than 70 °C need derating use (- 0.15W/°C), but the max shell temperature shall not be more than 90 °C.

(2)Capacitive load:

The output of the module can be applied electrolytic capacitor, but too much capacity and low ESR may cause the module instability, or cause current limiting point become low,we recommend 100 uF/A of the output capacitance , the current is rated output current.
